Grain Short

Bleeds - We can not guarantee perfect bleeds. Slight variations occur naturally in the printed stock directly affects the process, with press bounce & missing ink. Profile Die system on larger orders (25,000+) or standing in stock that has been addressed die cut and scored. Grain direction is critical for Profile Dies. Knowledge - Please keep knockout areas free of ink and varnish, as they may cause glue to ball. Wetting the sheet can be helpful in protecting heavy ink coverage from missing during converting.

Guides and Grippers - Please make sure if running a full food release and gripper die, you are addressing to the sheet size. Print Fold Marks on sheet. Do not print Die Marks.

Trim - Exact adherence to die layout reduces the need for trim before die cutting. Contact layout on press sheet. Critical designs may still require trim to insure folding tolerances.

Inside This - Please call for special layout.
