Outside View
Die #99
#7-3/4 Diagonal Seam Layout
1up Sheet: 9-3/4 x 14-1/4
Grain Short

Bleeds - We can not guarantee perfect bleeds. Slight variation occurs naturally in the die cutting & coating process. For best results, allow 1/8 tolerance. The quality of the printed stock directly affects the process, with press bronze & matte stock yielding the best results. Varnishes can cause bleed problems. Dry varnish or matte varnish on paper orders 25,000 x 1/1 or sending in stock that has been allowed to age and acclimate. Dark colors is critical for matte bleeds.

Knockouts - Please keep knockout areas free of inks and varnishes, as they may cause glue to fail. Varnishing half sheet can be helpful in producing heavy ink coverage from marking during converting.

Guide and Gripper - Please mark and if running a full sheet please add gripper and color bar dimensions to the sheet size. Print Fold Marks on sheet. Do not print Die Marks.

Trim - Exact adherence to die layout reduces the need for trim before die cutting. Poorly layout or one-edge press sheet may cause trim to be off. Do not print Die Marks on sheet. Critical designs may still require trim to ensure blade tolerances.

Inside Trim - Please call for special layout.
