Bleeds - We can not guarantee perfect bleeds. Slight variation occurs naturally in the die cutting & folding process. For best results, allow 1/8" clearance. The quality of the printed stock directly affects the process, with Profile Die system is either for Profiles Dies.
Knockouts - Please keep knockout areas free of inks and varnishes, as they may cause glue to fail. Varnishing the sheet can be helpful in providing a heavy ink coverage from marking during converting.
Guide and Gripper - Please mark and if running a full flood please add gripper and color bar dimensions to the sheet size. Print Ad Marks on sheet. Do not print the marks.
Trim - Exact adherence to the die layout reduces the need for trim before die cutting. Position layout at one edge of press sheet using 1 up sheet size as guide, do not center layout on press sheet. Critical
Inside Trim - Please call for special layout
Outside View
Die #261
1up Sheet: 9-5/8 x 14
Grain Short
