Bleed Variance

NO INK

FOLD MARKS

Blanks - We can not guarantee perfect blanks. Slight variation occurs naturally in the die cutting & folding process. For best results, please keep the grain direction consistent on a project. Variances can be reduced by using our Variety Pack (25,000 ct.) or selecting a stock that has been blanked in the same direction. Please allow for 5% overage from ordered quantity.

Moisture - Please wait 24 hours after printing before folding. Ink and adhesive may not dry properly if exposed to moisture. Please store envelopes in a dry area.

Glues and Gripper - Please keep glue flaps free of dust, dirt and oils. Do not print close to trim edges. Gripper may not work properly if printed too close to the trim edge.

Trim - Exact dimensions to the specified size. Please allow for trim variance of 1/32" per edge. Trim may spill inside the box.

Inside Trim - Please call for special layout.
