4700 9th AVENUE NW, SEATTLE, WA 98107
www.seattleenvelope.com

Outside View
6-1/2 x 9-1/2 Open End
DIE 127
Sheet Size: 13 x 14-1/4
Grain short

Bleeds - We can not guarantee perfect bleeds. Slight variation occurs naturally in the die cutting & folding process. For best results, allow 1/8" tolerance. The quality of the printed stock directly affects the process, with press bounce & missing side guidelines having a negative impact. Weir-Grain is a 25,000+ dpi process. Grain direction is critical for Profile Dies.

Knockouts - Please keep knockout areas free of inks and varnishes, as they may cause glue to fail. Varnishing the sheet can be helpful in protecting heavy ink coverage from marking during converting.

Guide and Gripper - Please mark and if running a full flood please add gripper and color bar dimensions to the sheet size. Print Fold Marks on sheet. Do not print Die Marks.

Trim - Exact adherence to die layout reduces the need for trim before die cutting. Position layout at one edge of press sheet using 1 up sheet size as guide, do not center layout on press sheet. Critical designs may still require trim to insure folding tolerances.

Inside Trims - Please call for special layout.
