 NO INK  
 FOLD MARKS  
 Bleed variance

**Bleeds** - We can not guarantee perfect bleeds. Slight variations occur naturally in the die cutting & loading process. For best results, allow 1/8" tolerance. The quality of the printed stock directly affects the process; with premium bleeds & missing area. Please refer to the bleed area on the die proof. The bleed area is the area that will be cut out. The bleed area is not the same as the registration mark. The registration mark is used to align the plates during the printing process. The registration mark is not the same as the registration mark. The registration mark is not the same as the registration mark.

**Knockouts** - Please keep knockout areas free of ink and variances, as they may cause glue to fail. Warning the sheet can be helpful in protecting heavy ink coverage from making during converting.

**Guides and Groppers** - Please make sure if running a full bleed please add gripper Die Marks. For dimensions to the sheet size. Print Foot Marks on sheet. Do not print them. Exact reference to die layout includes the need for trim before die cutting. Position layout at one edge of press sheet using 1 up sheet as a guide. do not include bleed area. Critical designs they still require trim to ensure holding tolerance.

**Inside Trims** - Please call for special layout.
